

www.animoto.com/education

Click on the “apply now” button and fill in the required information. Click “submit application”. They will review your application and then email you. When your application is approved then follow these steps:

1. Go to www.animoto.com and click on the “sign in” button. Enter your e-mail address and password.
2. Click “Create Video” in the upper right corner.
3. Click on a style choice and then the “create video” button that pops up.
4. Upload your pictures from your computer or where ever you have them stored. If you hold the control button down on your keyboard you can click on multiple pictures to upload at one time. When they are uploaded you can switch the picture thumbnails around to get them in the order you want them to play.
5. Click on the Music tab. You have to have music for Animoto to work. If you don’t want music, pick something anyway and mute the volume when it plays. Your slide show will only be as long as your music file so choose a long music file if you are planning on a longer video. If you upload your own music it has to be in one file only.
6. Click “Save and Continue”.
7. Choose any of the customization features you want and then click “Continue”.
8. Type in a name and click “create video”. It can take about 15-10 minutes to render so go do something else for a while and check back later. When you log back in, click on “My videos” and you will see it. To download it, click on the picture and then choose the “Video Toolbox” button. You can download or edit it from there.

Note:

If you are planning on projecting the slideshow on a large screen, then buy the high resolution credit for \$5. Otherwise, it will be grainy when it enlarges from the free file. The file will play in Windows Media Player but if you want a flash file or other file format then download the free video converter from Any Video Converter (www.any-video-converter.com) to change it.
